

Bookware Single Label Printer

The Bookware Single Label Printer prints standard Bookware item labels on demand, in any quantity. The beauty of the Bookware Single Label Printer is that you can print as many labels as you like, without having to waste any blank labels that are left over, as sometimes happens when printing labels on the standard 8.5 x 11 sheet.

Great for:
Printing labels on the sales floor
Printing labels at remote locations
Labelling used book buybacks
Using with Bookware Mobile POS

Compact Footprint:
Width 5.0"
Height 6.1"
Depth 9.4"

Because it has a very small footprint and connects directly to your computer by USB, the Bookware Single Label Printer is an ideal solution for crowded work spaces.

The 1" by 2" labels are printed in a single strip and are printed at a rate of five labels per second.

The Bookware Single Label Printer is fully compatible with Bookware6 and is able to print all formats of Bookware labels which can be printed on Bookware's standard 8.5 x 11 label sheets.

The Bookware Single Label Printer uses the same Label Printing program in Bookware as the regular labels sheets; all you need to do is choose the single label format when printing.

Fits in anywhere you don't have room for a full size printer.

Small and quick, the Bookware Single Label Printer provides labels where you need them, when you need them.
